

Sam Blatus

4th grade at Cox Elementary, Mrs. Derossett's class

The Morse code

The person I really want to meet is Samuel Morse because he created the morse code! he believed his invention was successful and it became very useful over the years, and because of his belief it was pretty useful and a lot of people used the morse code. Samuel Morse change the way people communicate, he made easier for people to communicate. The morse code made it so much faster to communicate with other people. The morse code was a very smart idea to think of, he kind of changed the world meaning changing the way people communicate. I wonder what inspired Samuel Morse to invent the morse code? I think the reason the morse code was successful was because he believed it was going to be successful and it was going to be very useful, when you believe in yourself good things happen. After years went on there was something new, the phones, the morse code wasn't as needed as the phones. A very few people still used morse code at least that's what I'm guessing but Samuel Morse still believed in himself and he will come back again and he will make a new big hit, believe in yourself.

“This year I have learned to take my time, use my imagination, and put it on paper. Writing takes time, but you can be creative.”
